FOR IMMEDIATE RELEASE

'Powerplus Group' Work With 'MegaClose' To Deliver Modern Student Accommodation Development in The City

'Powerplus Group chosen to deliver comprehensive multi-discipline works for major project'

Nottingham UK, Thursday 18th June 2020 – Against a backdrop of a global health crisis and challenging business conditions everywhere, Nottingham based infrastructure specialists 'Powerplus Group' have secured their latest major project, delivering part of a brand-new student accommodation development in the heart of the city.

Having established a reputation for delivering innovative and sustainable solutions in all aspects of mechanical, electrical and lighting projects, 'Powerplus Group' will work alongside student accommodation provider 'MegaClose' on the latest development. The modern 69 bed project will mark another step towards recognising Nottingham as the UK's leading university city, with a popularity that's continued to grow thanks to the thriving student community and consistent success of its two universities.

The development will stand in the city centre location of Glasshouse Street, immersed fully in the focal point for student culture and the city's thriving higher education establishments. The development is yet another example of MegaClose's realised vision of providing a wide range of high-quality accommodation, within a half-mile radius of the universities.

'Powerplus Group' Director, Luke Handley commented: "Working with fantastic local clients such as Megaclose gives Powerplus Group a fantastic opportunity to deliver mechanical, electrical and plumbing services on high-profile schemes within key sectors, such as student accommodation. We're very much looking forward to offering MegaClose a comprehensive high-quality solution, on time and within budget. We're looking forward to the opportunity to develop a long-standing business relationship across this and other projects."

'Powerplus Group' took on a full MEP design consultancy role for this project, redesigning the original scheme with careful liaison with 'MegaClose' in order to fully meet the employer's requirements, in budget and on time. Works include electrical installations, room fit-outs, safety systems, modern bathroom pods and plant. Commencing in June, the project has a challenging delivery date of October 2020 completion, in order to be ready for students for the 2020/21 educational year.

Lewis Quayle, 'Powerplus Group' Business Development Manager, added: "Powerplus Group are delighted to have secured and commenced works on yet another student accommodation scheme in Nottingham. With Powerplus being a local Nottingham business, we are always delighted to contribute to our great city's improvement plans - especially with the local economy boost offered by students moving into the City to study at our fantastic Universities. It's a great pleasure to be involved with schemes like this."

About Powerplus Group:

'Powerplus Group' provide a fully integrated turnkey solution on mechanical, electrical, lighting and renewable projects. The group provides a range of specialist skills encompassing engineering, design, installation and maintenance. The combined experience, knowledge and expertise of all Powerplus divisions enables the group to develop and implement fully integrated solutions for some of the most complex and demanding mechanical, electrical and engineering installations.
